OXYBO (Back Office) helps you to administrate and manage your IPTV network, services and solutions :

- Head-End equipment
- Linear TV and Radio channels
- Time-Shifted services (Catch-up, Start-over)
- On Demand services (VOD, ...)
- OSS / BSS
- Messages
- Languages settings
- ...

OXYBO offers a modular configuration to extend or reduce functionalities (service, menu, submenu, ...), a specific or local customization (languages, channels, ...) to monetise the offered services to your customer.

ABMWARE built partnerships to ensure the best integration of its **OXY** middleware solution whatever the device like :

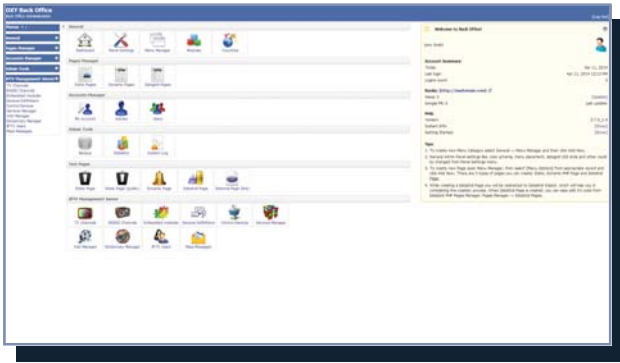

- Television set
- Set-Top-Box
- Mac & PC
- Telephone
- Tablet

PORTAL HOME PAGE (OXYBO)

OXYBO provides different levels of access and control : from the System Engineer to Hostess for the parameterization of customer services.

MODULAR CONFIGURATION (OXYBO)

OXYBO allows “a-la-carte” configuration services and modular list of features accessible by the client.

DEVICES MANAGER (OXYBO)

OXYBO gives in real time the status of connected devices and their maintenance status (updated, ...).

CHANNELS LISTS (OXYBO)

OXYBO allows “a-la-carte” configuration of TV and Radio channels broadcasted, accessible by the client.

ON-DEMAND SERVICES (OXYBO)

OXYBO allows manual editing and automatic updating data for “on-demand” contents (Video, ...).
